\*At the current rates of tax, the figure quoted is the saving of TAX/NI for a higher rate tax payer, devoting the maximum allowed £55 per week of salary, to childcare vouchers. A basic rate payer would save £904 per year on the same sum. Under current legislation, both working parents may receive vouchers from their employer - further increasing the overall family *tax savings*.

*Figures quoted are for guidance - the exact savings will depend on your personal circumstances.*
